

Timi's Tours Outfits Entire Fleet with Purification Technology from NFI Parts™

Louisville, Kentucky, USA – July 6, 2021 (TSX: NFI, OTC: NFYEF) NFI Parts™ (“NFI Parts”), a subsidiary of NFI Group Inc., one of the world’s leading independent bus manufacturers, has been selected by Timi’s Tours to outfit its fleet with the NFI Parts exclusive Proactive Air and Surface Purification (“PASP”) system to ensure the safety of drivers and passengers.

The PASP system uses proprietary technology to create advanced purification by producing High Energy Clusters which are distributed throughout the interior of the vehicle, safely sanitizing both air and surfaces, and leaving behind virtually no harmful residue. The system can mount directly in the passenger compartment, or in a motor coach evaporator compartment for direct exposure to where viruses may circulate. Installation only requires 12V power to operate and does not void any vehicle system warranties.

"The NFI Parts PASP system is unparalleled for its quick, seamless integration into our fleet," said Jack Kaufman, Vice President at Timi’s Tours. "Its ease of use truly makes it a ‘set it and forget it’ product that requires no training for our operators or cleaning staff. The system is always on when the coach is operational providing safe, clean, air and surfaces for our clients and employees."

Timi’s Tours has affixed a decal by the coach doors and provides literature to their passengers so that they are aware of what the system is and how it works. Clients and passengers have responded very positively knowing the coaches they are riding are actively being purified while the vehicles run. For some customers looking to book a trip, systems like PASP have become a requirement; therefore, having the entire fleet equipped has been extremely beneficial.

"Setting up these systems on all of our J4500’s and J3500’s was one of the simplest installations I’ve ever experienced. The kits came with step-by-step guides which made for a smooth installation," said Brylan Kennedy, Lead Technician at Timi’s Tours. "I would highly recommend all companies install these systems for not only comfort and peace of mind, but because they are one of the easiest to install products I have come across."

NFI Parts created a portfolio of products, the Clean and Protect™ product line, to keep vehicles moving throughout the pandemic. The PASP system has been a well-received addition for its proven effectiveness, ease of installation and universal application.

"We’re very encouraged to see coach operators moving again and we want to be there to support this," said Scott Robertson, VP of Customer Service at NFI Parts. "With the PASP system, and other safety technologies we’ve added to our catalog in the last year, we want to help operators find the right products for their fleet, staff and riders. Their success is our success and we will continue to be here as a partner as we move through the remainder of the pandemic, and beyond."

NFI Parts is North America's most comprehensive parts organization, providing replacement parts, technical publications, training, service, and support for NFI’s OEM product lines.

About NFI Group

With 8,000 team members in ten countries, NFI is a leading global bus manufacturer of mass mobility solutions under the brands New Flyer® (heavy-duty transit buses), MCI® (motor coaches), Alexander Dennis Limited (single and double-deck buses), Plaxton (motor coaches), ARBOC® (low-floor cutaway and medium-duty buses), and NFI Parts™. NFI currently offers the widest range of sustainable drive systems available, including zero-emission electric (trolley, battery, and fuel cell), natural gas, electric hybrid, and clean diesel.

In total, NFI supports its installed base of over 105,000 buses and coaches around the world. NFI common shares are traded on the Toronto Stock Exchange under the symbol NFI. News and information is available at www.nfigroup.com, www.newflyer.com, www.mcicoach.com, www.arbocsv.com, www.alexander-dennis.com, and www.nfi.parts.

About NFI Parts

NFI Parts™ is North America's most comprehensive organization providing parts, technical publications, training, and support for buses and motor coaches. NFI Parts is the parts division of NFI Group, providing replacement parts for New Flyer® transit buses, MCI® motor coaches, ADL buses, ARBOC® vehicles, as well as the product lines for the acquired NABI and Orion parts businesses. Additionally, NFI Parts has extensive cross references for parts that are common with other bus, coach, and cutaway product lines and has a mature supply base and established relationships with over 1,000 suppliers.

With over 90 years of parts experience, NFI Parts supports a combined fleet of 75,000 active transit buses, motor coaches and cutaway vehicles. NFI Parts serves more than 5,000 customers annually. NFI Parts understands the operational importance of getting the right parts, on time, all the time; allowing customer maintenance teams to focus on repairs and returning vehicles to service quickly.
