

# Power Vented Safety Roof Hatch Kit

INFORMATION SHEET

nfi.parts™

MCI

NEW FLYER

## Add ventilation and improve passenger comfort.

The power safety vent is a combination emergency exit and roof ventilator that utilizes the built in electric fan for extracting condensation, stale or hot air from inside the vehicle to improve passenger safety.

### Straightforward Installation

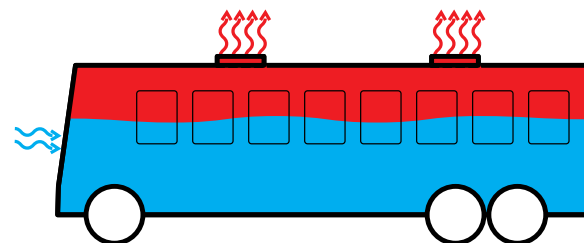

Simply remove your existing roof hatch lid from your existing bezel and install the new power lids

Run Power and Switch Circuit

Install Switch

Allows fresh air to circulate

## FEATURES

- Constructed of high strength UV stable materials
- Universal fit application - fits most transit buses and motor coaches (MCI VIN 65000+) with an existing 24" x 24" manual roof hatch (not compatible with the motorized roof hatches)
- Creates a powerful airflow and cross breeze with a durable low profile fan
- Available in white (typical transit applications) or gray (typical motor coach applications) interior color
