LTL & Truckload

Less-than-Truckload (LTL)

Less than truckload shipments require added structural protection due to multiple terminal handlings and stacking/mixing with other company's product.

Shipments are considered as LTL if they meet the following criteria:

- Palletized shipments that do not consume more than half of a trailer.
- Maximum 6 standard pallets (48'L x 48"W x 48"H)
- Maximum Length, Width, and Height of a single pallet (72"L x 58"W x 101"H)
- Shipment weight is between 76 lbs. and 6,000 lbs. (maximum).
- Shipments that do not exceed a total of 14 linear feet (168 inches) in a single shipment.
- A single pallet cannot exceed 6 linear feet (72 inches).

LTL/TL Routing Matrix

The table below summarize the preferred shipment method for LTL/TL by PDC Destination:

Ship From USA and MX Origin:	Destination: PDC Location	
	Carrier Details	
USA LTL		
All States, except HI	Ship To:	CA1 - NFI Parts, Fresno, CA
	Ship via:	XPO - TEL: (800) 755-2728

	Ship via:	Manitoulin - TEL: 800-265-1485
	Bill To:	3rd Party – Prepaid: Manitoulin Account # 180046

Truckloads (TL)

Shipments are considered full truck load under the following criteria.

- Shipments that exceed 6 pallets in a single shipment as per carrier above.
- Shipments that exceed 14 linear feet in a single shipment as per carrier above.
- A single pallet exceeds 6 linear feet, or the shipment weight exceeds 6,000 lbs.

You MUST Contact NFI Traffic Department for full truckload shipments – Tel: (888) 858-2747 / [nfipartsfreight@nfi.parts.com](mailto:nfipartsfreight@nfi.parts)

Carrier MUST block loaded skids with wood or load bars to prevent shifting of the load during transport for both LTL and TL shipments. All shipments must have securing points for proper lashing and securing to prevent damage during transport for both LTL and TL shipments.
